

Control budgets, drive down costs and increase 'straight-through' invoice processing

We can help with your immediate priorities:

- ① Gaining full visibility and control of spend.
- ① Early payment revenue and better cashflow.
- ① Minimizing the cost and time of invoice processing, while maintaining control of budgets.
- ① Preventing payment of duplicate or incorrect invoices.
- ① Having 24/7 visibility of invoice status.
- ① Removing time-consuming, error-prone and expensive manual processing.
- ① Strengthening supplier relationships.

Experiencing high volumes of invoice transactions? Proactis solutions eliminate paper-based invoices and manual processes, offering 100% touchless invoice processing.

Capture all of your invoices and convert non-electronic data (paper and PDFs) into einvoices, validate their accuracy by checking for a PO, duplicates and a valid supplier, and then transfer them into your finance system for matching and payment approval.

- ① Achieve 100% capture of all invoices from day one.
- ① Process the invoice, no matter the format.
- ① Deliver to the correct budget holder for checking at the correct moment.
- ① Pay the invoice.
- ① Archive all your invoices quickly and without errors with full integration with your existing Proactis.
- ① Purchase-to-Pay system or other finance / ERP / procurement solution.

① **Mears** increased AP performance by 500% (1,600,000 invoices per annum).
