

Software Developer (C# .NET / Full Stack)

Department: Development
Reports to: Development Team Lead
Location: Wetherby, West Yorkshire
Hours: 37.5 hours per week

Summary

As a .NET Developer you will be aligned with one of the company's agile product and development teams, working together with Product Owners, Software Developers and QA to realise the product roadmap as well as provide product support through bug fixes.

Primary responsibilities and accountabilities

You will be required to understand and contribute to your team's product roadmap, whilst following and enforcing software best practice and processes within the team. You will be working across the full development lifecycle, gaining deep knowledge of the product whilst using a broad modern technology stack (including .NET, ASP.NET MVC & Web API, RavenDB).

Skills and experience

Technical:

- Strong knowledge of:
 - C# & .NET Framework
 - ASP.NET MVC & Web API
 - HTML, CSS, JavaScript
 - Databases e.g. SQL Server / RavenDB
- Good knowledge of:
 - Software Design Patterns
