

Proactis for Public Sector

Achieve greater value and efficiency to deliver better services

Proactis' end-to-end procurement solution is specifically designed for Public Sector organizations, enabling you to deliver monetary savings, improved operational efficiency, greater governance and risk mitigation.

Used as a standalone or unified solution, Proactis enables state and local governments to create savings and value in key areas – with the highest levels of reliability, scalability and security.

Vendor management

Improve data timeliness, accuracy and visibility across agencies with supplier self-service.

Supplier portal

Provide vendors the ability to self-register 24/7, respond to bids and receive orders from other buyers.

Solicitations

Modernize solicitations with standardized sourcing templates, significant automation capabilities and organizational content libraries.

 **Contracts**

Create and manage contracts with a central, standard repository for improved visibility, transparency and accountability.

 **Purchasing**

Select products from a favorites list or online-hosted supplier catalogs, create requests from a template or add off-catalog items to a request.

 **Catalogs**

Scale and manage catalogs while providing users a guided purchasing experience within the existing ERP application.

 **Invoicing**

Track receipt of goods or services, entry of invoices, and 2-way/3-way matching for payment approval.

 **Business analytics**

Create standard reports with filters or custom reports based on data needs and easily export to a variety of formats.

“Proactis’ comprehensive Public Sector procurement solution improves strategic sourcing and contract management while operating with increased control and efficiency – throughout the procurement lifecycle.”

Serving the Public Sector at the federal, state, city and county level since 1996.
